Work Experience

Security Officer

Nov 2023 - Present

Allied Universal | Berkeley Heights, NJ

- Monitored and analyzed security systems to detect and respond to potential threats, demonstrating a strong ability to identify and troubleshoot issues effectively.
- Collaborated with team members to ensure the security of the premises, highlighting experience in working within a team to achieve common goals and maintain operational integrity.
- Maintained detailed logs and reports of security incidents, showcasing meticulous attention to detail and proficiency in documentation and reporting processes.

Software Developer

Jul 2022 - Dec 2022

Openpath Products | Annapolis, MD

- Designed and developed software applications according to specifications and requirements.
- Developed clean, efficient, and maintainable code using programming languages and frameworks.
- Implemented best practices during Code Reviews to maintain coding standards and optimize mobile and web applications for improved user experience.
- Managed and updated the company's Code Base to improve software performance and enhance user experience on mobile and web platforms.
- Provided technical expertise in Software Infrastructure, improving performance and efficiency of mobile and web platforms.

- Articulate in documenting code for user-friendly mobile apps, and websites, making it easier for team members to understand and maintain.

Technician

Jan 2018 - Jan 2022

U.S. Navy | FPO, AP

- Diagnosed and repaired complex electronic systems, demonstrating strong analytical and problem-solving skills essential for troubleshooting software issues.
- Collaborated with a multidisciplinary team to ensure the operational readiness of critical systems, highlighting experience in teamwork and project management in high-stakes environments.
- Maintained detailed technical documentation and reports, showcasing attention to detail and proficiency in documentation practices crucial for software development and project tracking.

Projects

Lunick Francois's Portfolio Website

Jun 2024 - Jun 2024

HTML, CSS, Javascript, Github Pages

- Designed and implemented the website structure and layout using HTML.
- Styled the website with CSS, ensuring responsive design for various devices and screen sizes.
- Developed interactive features and enhanced user experience with JavaScript.

AmazonClone

Jun 2024 - Present

React.js, HTML5, CSS3, Javascript, Git, Version Control

- Developed a search bar integrated into the navigation bar, allowing users to search for products efficiently.
- Utilized HTML5, CSS3, and React.js to ensure the homepage is visually appealing and functional across various devices and screen sizes.
- Designed and implemented a shopping cart page that allows users to view and manage their selected products.

FlavorVerse-iOS

Aug 2023 - Sep 2023

Swift, SwiftUI, Firebase, Debugging, UI/UX

- User Authentication: Secure login, account creation, and session management using Firebase.
- Recipe Management: Browse, save, and share a diverse range of recipes categorized by meal type.
- Real-Time Data: Integration with Firebase to fetch and display up-to-date recipe information.

StuToDo

Jan 2022 - Mar 2022

Swift, Apple Xcode, Firebase, Debugging, UI/UX, Git, iOS SDK, Version Control

- User Authentication: Secure login, account creation, and password management using Firebase Authentication.
- Task Management: Easily create, edit, categorize, and track tasks.
- Real-Time Data Sync: Data management with Firebase Firestore for real-time updates.
- Offline Support: Manage tasks offline with data syncing upon reconnection.

Let's Chat

Jul 2021 - Aug 2021

Swift, Apple Xcode, Firebase, Debugging, UI/UX, MVVM, Version Control, Git, REST APIs, iOS SDK

- Scalable Architecture: The app employs a modular architecture using MVC and MVVM design patterns to ensure maintainability and scalability.
- Real-Time Messaging: Instant messaging capabilities with a responsive and user-friendly chat interface.
